Fox chair/armchair, design Carl Öjerstam.

Design that makes life easier.

Fox is a stackable chair/armchair with a sleek design. The clean look is enhanced by the fact that the wooden tubing on the armrests has no visible fixings. At the same time, the structure is sturdy and a perfect match for the stringent requirements in terms of flexibility and durability imposed by public environments and modern-day offices. Furthermore, the newly-developed connector that's built into the chair's stacking mechanism makes it ideal when furnishing different kind of meetings. Fox is available in a wide range of different variants. Browse our website to find out more.
