Press release 2017-09-08

Launch of the Neo Lite bar stool.

We will launch the brand new bar stool Neo Lite at Designers Saturday in Oslo on 8 to 10 September. Our popular Neo/Neo Lite range has previously consisted of exclusive conference chairs and armchairs in different designs. Now it is being expanded with the Neo Lite bar stool.

"Neo Lite is a comfortable bar stool which looks interesting and enlivening, regardless of which direction you look at it from. The beautiful lines create a design that feels obvious and natural. Solid work is hidden behind each detail. It was carefully tested and thought through," says Tobias Söder, Sales and Marketing Manager at Materia.

Neo Lite has a polypropene seat shell and will be launched in white, grey, black and storm blue. The seat is available non-upholstered or upholstered. The steel wire frame is available in chrome, or white, black or silver grey powder coating. The bar stool can be stacked making it easy to store away and transport.

Designers Saturday is Norway's largest meeting event for furniture and interior design. This year's event will bring together 190 exhibitors located in 36 locations around Oslo.

Materia was founded in 1992 and is one of Scandinavia's most renowned brands within the field of design furniture for public settings. The company develops and manufactures furniture and interior fittings with an innovative design that makes the user's everyday life easier.
