

Spring's new arrivals are here

Materia develops and manufactures design furniture for creative meeting areas and dynamic organisations. Our furniture should inspire and encourage meetings, as this is when we meet and make use of each other's skills and experiences. The environment and sustainability are of the utmost importance to us. As such, we always use for example FSC-labelled wood, recycled steel and, recycled aluminium.

We are proud to present this spring's new products. The unique YARN armchair features a hand-braided hemp string back, as well as wool and hairlok padding, which consists of horse hair and natural latex. The DOMINO chair and table series, with its elegant oval legs, is made of solid and veneered ash. The UNI folding table with its lockable castors and intermittent brakes complements the flexible table series of the same name. The AMBIENT beam furniture has been updated to include a 2-seater unit and a corner connection with table. The PILOT conference chair now also has a high back, which gives it an even more exclusive look, as well as comfortable support for the entire back and head. Read more about our new spring products below.

YARN armchair

Design: Mia Cullin

Yarn is a unique and environmentally friendly armchair developed in the experimental collaborative project called "The Kinship Method". The armchair with its few components, has a light weight and an almost floating look. Sustainability and the environmental impact have been central to the design and choice of materials. In Materia's production, the backrest's beautiful pattern is braided by hand using hemp strings. The seat and back cushions are padded with hairlok, which is a mixture of horsehair and natural latex, as well as needle felt. To provide extra comfort, wool is also included as part of the back cushion. The wood is FSC®-labelled, and the frame with recycled steel is available in all Colours by Materia (CbM*) colours. Yarn is suitable for many different spaces, such as hotels, restaurants, and in offices. The armchair is also an excellent choice when environmentally friendly furniture is a requirement.

*Colours by Materia (CbM) = beige, mustard yellow, dusty pink, rusty red, burgundy red, blue grey, green, grey, dark grey, black, white

DOMINO chair/table

Design: Axel Bjurström

The Domino chair and tables in three different sizes, are characterised by light organic shapes and an appealing character. The series is produced from FSC®-labelled wood, which means that it generates a minimal carbon footprint. The chair and tables are made of solid and veneered ash. The finish is in white pigmented or black stained ash. The decorative metal fastener towards the round table top, and the sand cast iron foot, are both in Colours by Materia (CbM) dark grey powder coating. The warm feel of the wood, the concealed fixings, and the oval shape of the legs contribute to the elegant design. The chair is stackable and is available non-upholstered, with an upholstered seat, or with an upholstered seat and inner back. The Domino series is suitable for many different spaces such as cafes, restaurants, dining rooms, offices, break areas or other types of spaces with high demands on flexibility and dense furnishing.

UNI folding table

Design: Axel Bjurström

The Uni folding table complements the flexible Uni table series. The four lockable castors with intermittent brakes make the table easy to move, as well as stable and steady when locked. The folding table can easily be folded together by pulling the bar under the table top towards oneself. It is available in three sizes and several different finishes. A stacking protector prevents scratches when the tables are stacked together for storage. The Uni folding table is suitable for meeting rooms, cafeterias, social spaces, and lecture halls. The wood is FSC®-labelled. Frame in chrome or Colours by Materia (CbM*) powder coating.

*Colours by Materia (CbM) = beige, mustard yellow, dusty pink, rusty red, burgundy red, blue grey, green, grey, dark grey, black, white

PILOT conference chair with high back

Design: Fredrik Mattson

Pilot is a conference chair with an enhanced sense of support and an inviting design. The gently sloping backrest gives character but, above all, comfort. The backrest is available in two different heights, low and high. The high backrest is new for the spring of 2022. This gives the conference chair an even more exclusive look, and makes it perfect for longer meetings, as you can lean back and receive support for your entire back and head. Details such as the gently arched armrests and the opening between the seat and the backrest create a functional design. Pilot is height-adjustable, rotatable, and has a tilt function, which provides a flexible and ergonomic way of sitting. The wood is FSC®-labelled. The frame is available in Colours by Materia (CbM*) powder coating. Choose between castors and glides.

*Colours by Materia (CbM) = beige, mustard yellow, dusty pink, rusty red, burgundy red, blue grey, green, grey, dark grey, black, white

AMBIENT beam sofa with 2-seater unit + corner connection with table

Design: Fredrik Mattson

The Ambient beam sofa focuses on design and comfort. While sturdy, the design is neat, minimalistic and sophisticated. The seat units can easily be replaced individually, if necessary. The 2-seater unit is one of the new features for the spring of 2022 alongside the corner unit with round table top, which can be mounted in five different positions. Ambient has many options, such as different beam lengths, several types of armrests, screens with or without magazine holders, and tables that provide a pleasant extra surface. As a complement to the table tops are borders and magazine holders as well as a black plant tray. The solid wood table tops, like the wooden seat base, are FSC®-labelled. Power outlets in the table top and fittings for floor mounting are available as accessories. Frame, armrests, borders for table tops and magazine holders in Colours by Materia (CbM*) powder coating. The flexible Ambient beam sofa is suitable for lounge areas, coworking spaces, hospitals, schools, and universities.

*Colours by Materia (CbM) = beige, mustard yellow, dusty pink, rusty red, burgundy red, blue grey, green, grey, dark grey, black, white
