

MATERIA[®]

Collection 2022

Design meets new products.

Materia develops and manufactures design furniture for creative meeting areas and dynamic organisations. Our furniture should inspire and encourage meetings, as this is when we meet and make use of each other's skills and experiences. The environment and sustainability are of the utmost importance to us. As such, we always use for example FSC®-labelled wood, recycled steel and, recycled aluminium.

We are proud to present this spring's new products. The unique YARN armchair features a hand-braided hemp string back, as well as wool and hairlok padding, which consists of horse hair and natural latex. The DOMINO chair and table series, with its elegant oval legs, is made of solid and veneered ash. The UNI folding table with its lockable castors and intermittent brakes complements the flexible table series of the same name. The AMBIENT beam furniture has been updated to include a 2-seater unit and a corner connection with a table that makes it possible to connect beams at different angles. And to conclude, the PILOT conference chair now also has a high back, which gives it an even more exclusive look, as well as comfortable support for the entire back and head. Read more about our new spring products on the following pages.

The mark of
responsible forestry

New products 2022

Ambient beam sofa with 2-seater unit + corner connection with table
Design: Fredrik Mattson

The Ambient beam sofa focuses on design and comfort. While sturdy, the design is neat, minimalistic and sophisticated. The seat units can easily be replaced individually, if necessary. The 2-seater unit is one of the new features for the spring of 2022 alongside the corner unit with round table top, which can be mounted in five different positions. Ambient has many options, such as different beam lengths, several types of armrests, screens with or without magazine holders, and tables that provide a pleasant extra surface. As a complement to the table tops are borders and magazine holders as well as a black plant tray. The solid wood table tops, like the wooden seat base, are FSC®-labelled. Power outlets in the table top and fittings for floor mounting are available as accessories. Frame, armrests, borders for table tops and magazine holders in Colours by Materia (CbM*) powder coating. The flexible Ambient beam sofa is suitable for lounge areas, coworking spaces, hospitals, schools, and universities.

*Colours by Materia (CbM) = beige, mustard yellow, dusty pink, rusty red, burgundy red, blue grey, green, grey, dark grey, black, white

Domino chair
Design: Axel Bjurström

The Domino chair and tables are characterised by light organic shapes and an appealing character. The series is made of FSC®-labelled wood, which means that it generates a minimal carbon footprint. The chair's frame is made of solid wood, while the seat and back are made of moulded veneer, and the finish is white pigmented or black stained ash. The warm feel of the wood, the concealed fixings, and the oval shape of the legs contribute to the elegant design. The chair, which is stackable, is an all-round chair suitable for many different spaces, such as cafes, dining rooms, and offices. The chair is available non-upholstered, with an upholstered seat, or with an upholstered seat and inner back.

Domino table
Design: Axel Bjurström

The Domino tables in three different sizes and the chair are characterised by light organic shapes and an appealing character. The series is made of FSC®-labelled wood, which means that it generates a minimal carbon footprint. The tables have pillars or legs of genuine solid ash. The round pillar table has a table top of either solid rod-glued ash or veneered ash. The rectangular tables have veneered ash table tops. The finish is in white pigmented or black stained ash. The oval shape of the legs contributes to the elegant design. The decorative metal fastener at the round table, and the sand cast iron foot, are both in Colours by Materia (CbM*) dark grey powder coating. The tables are intended for cafes, restaurants, dining rooms, break areas, or other types of spaces with high demands on flexibility and dense furnishing.

New products 2022

Uni folding table
Design: Axel Bjurström

The Uni folding table complements the flexible Uni table series. The four lockable castors with intermitted brakes make the table easy to move, as well as stable and steady when locked. The folding table can easily be folded together by pulling the bar under the tabletop towards oneself. It is available in three sizes and several different finishes. A stacking protector prevents scratches when the tables are stacked together for storage. The Uni folding table is suitable for everything from meeting rooms to cafeterias, social spaces, and lecture halls. The wood is FSC®-labelled. Frame in chrome or Colours by Materia (CbM*) powder coating.

*Colours by Materia (CbM) = beige, mustard yellow, dusty pink, rusty red, burgundy red, blue grey, green, grey, dark grey, black, white

Pilot conference chair with high back
Design: Fredrik Mattson

Pilot is a conference chair with an enhanced sense of support and an inviting design. The gently sloping backrest gives character but, above all, comfort. The backrest is available in two different heights, low and high. The high backrest is new for the spring of 2022. This gives the conference chair an even more exclusive look, and makes it perfect for longer meetings, as you can lean back and receive support for your entire back and head. Details such as the gently arched armrests and the opening between the seat and the backrest create a functional design. Pilot is height-adjustable, rotatable, and has a tilt function, which provides a flexible and ergonomic way of sitting. The wood is FSC®-labelled and the frame is available in Colours by Materia (CbM*) powder coating. Choose between castors and glides.

Yarn armchair
Design: Mia Cullin

Yarn is a unique and environmentally friendly armchair developed in the experimental collaborative project called "The Kinship Method". The armchair with its few components, has a light weight and an almost floating look. Sustainability and the environmental impact have been central to the design and choice of materials. In Materia's production, the backrest's beautiful pattern is braided by hand using hemp strings. The seat and back cushions are padded with hairlok, which is a mixture of horsehair and natural latex, as well as needle felt. To provide extra comfort, wool is also included as part of the back cushion. The wood is FSC®-labelled, and the frame with recycled steel is available in all Colours by Materia (CbM*) colours. Yarn is suitable for many different spaces, such as hotels, restaurants, and in offices. The armchair is also an excellent choice when environmentally friendly furniture is a requirement.

*Colours by Materia (CbM) = beige, mustard yellow, dusty pink, rusty red, burgundy red, blue grey, green, grey, dark grey, black, white

Be coloured by the choices.

Furnishing with colour gives you more opportunities to surprise, blend in or stand out. Colours by Materia (CbM) is our answer to everyone with an open mind. CbM reflects Materia's identity, and the selection was made together with some of Sweden's most distinguished architects. The colours beige, mustard yellow, dusty pink, rusty red, burgundy red, blue grey, green, grey, dark grey, black, and white also match each other, making it easy to combine different colours within the scale. They are all available as standard for a number of our products. Be coloured by the choices.

The products that come with CbM as standard are: Alto easy chair/sofa/table, Ambient beam sofa, Anagram bar stool/chair/armchair, Cap stool, Crest bench/easy chair/sofa/table, Hopper table, Motus stool/chair, Neo Lite bar stool/chair/armchair/easy chair, Pax chair, Picnic table/bench/stool/metal box, Pilot conference chair, Ro easy chair/sofa, Rocca stool, Today bench/daybed, Uni table, Uni folding table, Uni Large conference table, Vagabond table, Vagabond Duo table, Vagabond Project table, Vagabond Screen table, Vagabond Office Kit and Yarn armchair.

Do not hesitate to contact us.

This product overview is not large enough to show you all the options available to you. For instance, you can order many of our furniture and accessories in different sizes and choose your colour. We will gladly get involved at an early stage in the decision making process and work with you to come up with unique solutions, customised to meet any specific requirements. And we will of course answer any questions you may have about us and our products. Welcome.
