

Turning leftover fabric into something new.

Re-fold cushion which was recently launched is part of our unique sustainability mindset, where leftover fabric from our production is used to design something new.

Design by Marie Oscarsson

Re-fold is made from leftover fabric in a darker shade at the back, as well as on the decorative top edge at the front, combined with a lighter shade at the bottom of the front. This gives you a flexible cushion with dual looks, two-tone on one side and a uniform colour on the other.

The fabrics used in these unique cushions depend on which leftover fabrics are available on the day of production. The Re-fold cushion, in three different sizes, are available in the Colours by Materia (CbM) shades; beige, mustard yellow, dusty pink, rusty red, burgundy red, blue grey, green and grey. The padding consists of siliconised ball fibre from 100% recycled PET bottles.

The sizes of Re-fold are: 600x600 mm, 550x350 mm, and 450x450 mm.
